

The Spravato® inventory system, *on its own.*

Lucido Lite is Lucido's controlled-substance inventory, on its own plan: every carton of Spravato® from delivery to the patient who received it or its witnessed destruction, and a reconciliation each month for you to sign. For a clinic whose treatment day already runs on something it keeps. One web app on the phones and the desk you already have, at one flat price per location.

01 · RECEIVING

Every carton, scanned in

- **On a phone, at the door.** Serial, lot and expiry off the carton's barcode, or the printed code read by the camera.
- **Or the order report, imported.** The wholesaler's report, matched line by line against the order.
- **No expiry, no receipt.** A carton isn't received without its expiry, scanned or typed.

03 · THE 45-DAY CLOCK

Pharmacy-supplied cartons

- **Each one names its patient** and counts down Janssen's 45-day limit from delivery.
- **An email as it nears**, so a carton is used or destroyed in time.
- **Past 45 days it can only be destroyed.** Lucido won't let it be given.

05 · MONTH-END

A month you sign

- **The reconciliation builds itself:** opening, received, given, destroyed and closing, carton by carton.
- **Signed, it can't be edited**, and if the books change later, Lucido flags the month.
- **A summary by email** in the first week of each month, with a link to sign.

07 · MORE THAN ONE LOCATION

Every location in one view

- **One login sees every location's stock** and each location's signed months.
- **Work inside a location that allows it**, or run one from the hub with no login of its own.
- **Each keeps its own shelf and log.** Stock never moves between locations; networks are for common ownership.

02 · GIVING

Every dose, under a name

- **On the phone or at the desk**, recorded under the name of the person who gave it.
- **A simple roster:** each patient's name, date of birth, and how their SPRAVATO® is supplied.
- **A patient's own carton** is picked for them when it was pharmacy-supplied.

04 · DESTRUCTION AND COUNTS

Signed, witnessed, counted

- **Signed by the person who did it**, with their own four-digit PIN.
- **Witnessed where you require it**, on a phone or at the desk, by staff you allow to witness, never the person who recorded it.
- **Blind counts** hide the totals until staff finish, and a count that won't reconcile needs a written resolution.

06 · INSPECTION DAY

The records an inspector asks for

- **Destructions laid out the way Form 41 asks**, and a theft or loss tracked to its deadlines. Lucido tracks Form 106; it doesn't file it.
- **The binder in one download:** every signed month and every destruction, with no patient names.
- **The Controlled Substance Log** as a spreadsheet, and the two spreadsheets a REMS audit asks for.

08 · DATA AND ACCESS

What happens to the records

- **HIPAA-eligible AWS under a signed BAA**, encrypted in transit and at rest.
- **An audit log that can't be edited**, and a carton keeps its patient's name for two years after its last movement.
- **Want the treatment day too?** The rest of Lucido turns on over the same records. Nothing is typed twice.
