

DAY-OF COMPLIANCE FOR SPRAVATO® CLINICS

The REMS form fills itself — and files itself, in one touch.

Lucido fills the genuine REMS Patient Monitoring Form as the session happens. At discharge, one touch faxes it to the Janssen REMS line — delivery-confirmed, auto-marked as filed, permanent receipt kept as proof.

2 hr ON-SITE MONITORING, EVERY SINGLE DOSE	3+ VITAL CHECKS PER SESSION	7 days TO FILE — OR THE CERT IS AT RISK	\$0 PER-SESSION OR PER-PATIENT FEES
---	--	--	--

THE DAY ON PAPER

- Vitals transcribed by hand — one misread number, wrong record.
- The two-hour window watched on whatever's handy.
- REMS forms filled **after hours**, against a seven-day deadline.
- "Who recorded that, and when?" — no clean answer.

THE DAY WITH LUCIDO

- One live board runs the floor — rooms by phase, one **"Up Next"** action, vitals green or orange at a glance.
- The two-hour clock is **enforced** — discharge can't run early.
- Discharge fills the **genuine Janssen REMS form** — one click faxes it to the REMS program, delivery-confirmed with a permanent receipt. Or download and file it yourself.
- Every action signed to a named person on an append-only log — proof before anyone asks.

Three surfaces, one source of truth.

OWNER / FRONT DESK

Owner desktop

The live room grid, today's queue, and the filing backlog — run the floor from reception.

CLINICIANS

Staff phone

Walks the session phase by phase — vitals, dosing, observations, the SAE review, discharge.

THE PATIENT

Patient phone

No app, no account — and entirely optional. Above all a direct line to staff: a help button that reaches the floor at once, beside a calm countdown.

Lucido is the cockpit, *not the filing cabinet*.

It captures every field as the session happens, hands you a ready-to-file record, then lets go — the record auto-deletes after your retention window. No PHI piles up.

Everything your medical director will ask — already true.

- **HIPAA-eligible AWS**, with a signed Business Associate Addendum.
- **Completed records are tamper-proof** — no edits after the fact.
- **Minimal PHI** — only what the form needs; no analytics vendor.
- **Encrypted** in transit and at rest — database, backups, and audit log.
- **Append-only audit log**, kept seven years, owner-exportable.
- **Automatic logoff** on idle — a HIPAA safeguard on shared devices.

One flat monthly price. One missed deadline costs more.

One price per clinic, per month — no per-session or per-patient fees, cancel anytime. Running several sites? Run them as a network: one consolidated bill with automatic volume pricing, each location still its own REMS-certified site. One form past seven days risks your certification and the revenue behind it; Lucido tracks every deadline so none slip. Live now, onboarding our first Spravato® clinics.
